

Micro-Investment & Savings Platform for Gig Workers

"Your income changes every day. Your financial plan should too."

An intelligent, zero-effort fintech platform for gig workers — delivery riders, drivers, and freelancers with irregular income — that auto-saves, auto-invests, and auto-reserves tax from every payout, with full explainability and user control.

The Problem

India's gig workforce is growing fast — but its financial tools haven't kept up.

Income Volatility

Gig workers have no fixed monthly paycheck — earnings swing with shift volume, weather, and demand.

No Automatic Deductions

No employer PF/TDS withholding, which leads to year-end tax shocks.

Decision Fatigue

Deciding "how much to save or invest today" after a long shift is mentally exhausting.

The Solution

EarnWise is an intelligent micro-savings and investment platform designed for gig workers with irregular income. It analyzes incoming payouts against a 30-day earnings average and automatically allocates a safe portion toward emergency savings, tax reserves, and micro-investments while maintaining a minimum balance for daily expenses. The platform combines multi-source income tracking, forecasting, behavioral risk profiling, targeted savings goals, explainable automation with one-click undo, and a state-grounded AI financial copilot to help users manage unpredictable income with minimal effort.

Technical Approach

A modern, modular stack purpose-built for real-time financial decisioning.

Frontend

React 19, TypeScript, Vite

Styling / UI

Tailwind CSS, Lucide Icons, Plus Jakarta Sans

State Management

React Context API, modular service architecture

Core Logic

Decoupled decisionEngine.ts — 30-day moving average, 4-tier adaptive rules, ₹5,000 floor, ₹8,000/mo ceiling

Visuals

Interactive responsive SVG charts, Canvas Confetti, What-If growth simulator

Intelligence & Extras

Multi-platform income aggregation, 7-day forecast, payout simulator, risk profiler, state-grounded AI Copilot

Hackathon prototype · simulated data — no real UPI, bank, mutual fund or tax transactions · engine verified with test_engine.mjs

Why EarnWise Is Different

Five product decisions that set EarnWise apart from generic savings apps.

Daily Income as the Base Unit

Treats daily income, not monthly salary, as the base unit for financial planning.

Autonomous Decision Engine

A "Central Decision Engine" intercepts each payout and compares it with your 30-day average.

100% Explainability

Every auto-save, auto-invest, or tax action comes with a plain-language reason.

Override & 1-Click Undo

Zero-effort but never zero-control — reverse any automated action instantly.

Adaptive, Not Static

Auto-save adjusts by day: Slump 0%, Lean 5%, Normal 10-12%, Peak 15%.

Auto-save tiers vs 30-day average

Slump	< 60%	0%
Lean	60–100%	5%
Normal	100–150%	10–12%
Peak	> 150%	15%

Who EarnWise Serves

Gig Delivery Partners

Swiggy and Zomato riders.

Ride-Hailing Drivers

Uber and Rapido drivers.

Freelancers

And other irregular-income earners.

Common trait:

Daily/weekly variable payouts, no formal payroll deductions, and low engagement with traditional banking or SIP products.

Benefits & Advantages

Zero-Effort Growth

Automatic emergency fund + micro-investment allocation, no manual effort required.

No More Tax Shocks

Proportional advance-tax provisioning (10% per payout) plus calendar reminders.

Balance Floor & Ceiling

Protects a ₹5,000 minimum balance while capping over-saving at ₹8,000/mo.

Builds Habits, No Jargon

Grows financial habits without requiring financial literacy — every action explained in plain language.

Goal-Based Saving

Emergency Fund and Vehicle Maintenance goals are funded automatically by the engine.

Full Transparency

Complete audit logs and instant undo build lasting trust.

Behavior-Aware Micro-Allocation

Suggested mix for a Balanced risk profile

● Liquid Funds ● Nifty 50 Index ● Flexi RD ● Digital Gold

Research and USP

USP

Explainable automation for financially fragile gig workers: every auto-decision is justified in plain English (the mascot "explains why").
Progressive tiered saving that pauses on bad days — it doesn't squeeze workers who earned less.
70/30 goal waterfall that feeds emergency cushion first, then milestone goals.
Safe-to-Spend calculation where tracked expenses genuinely shrink discretionary allowance.
44ADA advance-tax readiness — gig freelancers often don't tax-plan; it provisions quarterly.
Charismatic mascot UI (Flat Mascot Playful design) making financial discipline feel playful.
